

LaysaCam®

(formerly Laysa-F)

Product

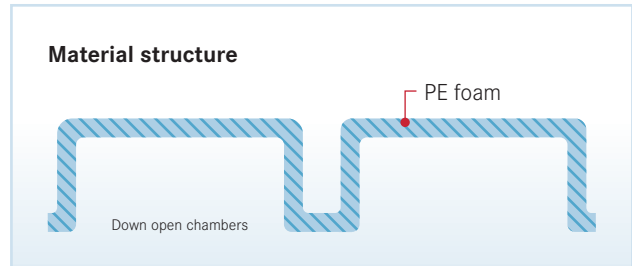

LaysaCam is a chamber absorber with high airborne sound absorbing effects. It consists of cross-linked PUR foam and is insensitive to dirt and absorption of moisture.

Application

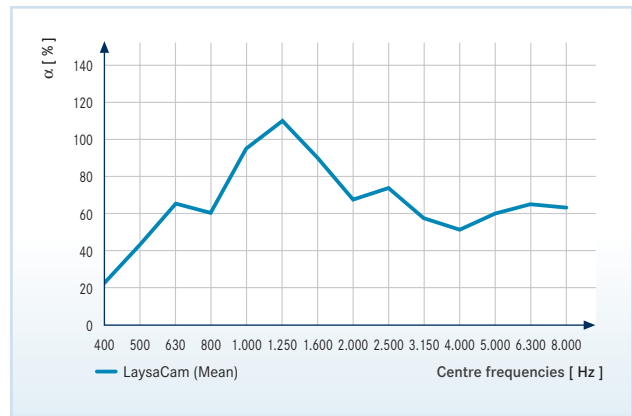

- Easy cutting with common instruments, such as knife, scissors.
- LaysaCam can be glued immediately on metal sheets, plastic materials, wood and other materials, or fastened mechanically.
- For the glueing of LaysaCam, it is important that the surface of the base is clean, dry and free from greases, oils, solvents and segregators.

Product characteristics

- excellent absorbing properties
- high heat consistency
- easy and clean mounting
- insensible to dirt and absorption of moisture
- low weight
- perfect heat insulation
- high form stability

Absorption

Absorption coefficient measured in cabin Alpha
