

Rubber foils

Product

Our rubber foils are produced on the base of natural caoutchouk with a thickness from 0.3 to 0.5 mm, a width of 900 mm and a roll length of 10 or 20 m. The rolls are spooled on hard paper core.

Application

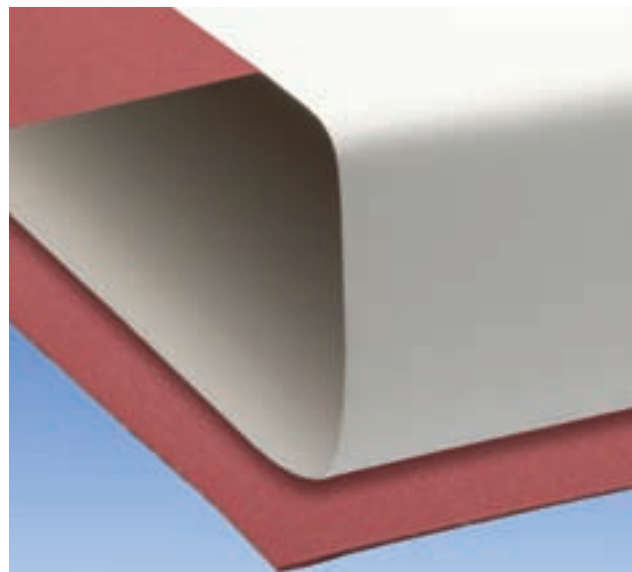

Easy cutting with scissors, knife or stamp. Glueing with double-sided scotch tape and cleaning and disinfection with common agents.

Product characteristics

- reliable sealing of vast surfases
- easy treatment
- high pricking durability
- good resistance to acids and alkaline solutions
- reproduced material

Range of application

- sealings
- protective foils
- aprons
- promotion articles

Rubber foil in two colours
